Advanced Clinical Reasoning and Treatment Planning for Praxis Intervention

Course Description:

This advanced-level clinical reasoning course builds upon the clinical intervention knowledge gained in the course Clinical Assessment and Practical Interventions for Praxis: From Ideation to Execution and allows for development of advanced clinical reasoning and treatment planning skills for praxis intervention. A clinical reasoning model will be presented and through use of case studies and group discussion, participants will develop and refine their ability to create effective treatment plans for praxis problems. Participants are encouraged to provide case study information and videos for group discussion and problem solving. Those desiring to review video for discussion must contact the speaker at least 2 weeks prior to the course to assure technical compatibility.

Learning Objectives at the end of the course the participant will be able to:

1. Identify praxis problems and select appropriate and effective intervention strategies and activities
2. Apply clinical reasoning to selection of activities to maximize impact of treatment
3. Create and apply effective treatment plans for praxis problems
